To Our Valued Distributors, Contractors, Builders, Dealers and Homeowners:

In the recent days, much discussion has taken place regarding Carb II compliance following the airing on CBS's program, 60 Minutes. We want to take this time to assure all our client base that all Sheoga Hardwood flooring (Unfinished Solid sold with the Sheoga logo; Prefinished Solid and Engineered flooring sold with the Graceful Collection logo; Unfinished Engineered sold with the Significant Collection logo) are milled entirely within the United States at our facility in Middlefield, Ohio.

Sheoga is committed to producing safe and environmentally-friendly flooring products and our commitment includes strict attention to quality control methods and the purchase of some of the highest grades of lumber available to be used in our raw materials mix. Our Engineered flooring line, the Significant Collection, is created using imported Polish FSC® Baltic Birch which is manufactured to meet or exceed the CARB Phase II Compliance standards.

Furthermore, Sheoga is **one** of only **five** manufacturers in the entire U.S. that has been certified to sell our products under the NWFA RPP (Responsible Procurement Program). This program is a joint initiative between leading environmental groups and industry manufacturers committed to producing and promoting wood floors from environmentally and socially responsible sources, improving forest sustainability for future generations. In addition, Sheoga has been certified by the Scientific Certification Systems (SCS) for Chain of Custody control and can sell our products under the FSC®-Mixed label.

All these steps showcase the level of commitment we feel to our world, community, employees, customers and distribution network. We take everyone's health and safety seriously and will continue to do so. Our future depends upon it.

Thank you for taking the time to review this message. For copies of our compliance certificates, please visit our website at <http://www.sheogaflooring.com/resources/> Please feel free to contact our office at 800-834-1180 for further questions or concerns.
