

DEEP CLEANING WOOD FLOORS

Over time, wood floors will accumulate residues such as oils, grease, and dirt, which will act like an abrasive on the wood floor. These residues will lead to premature wear patterns in the floor finish, which could potentially decrease the life of the floor. We recommend using PALLMANN® CLEAN STRONG yearly to remove these residues and protect and preserve the beauty of your wood floors. Listed below are the steps to deep clean a wood floor. This system is intended for **Professional Use Only**.

Steps:

- 1** Vacuum or sweep to remove large debris which may scratch the wood floor during buffing.
- 2** Dilute the PALLMANN® CLEAN STRONG into a spray bottle at a 1:10 ratio (1:5 for heavily soiled areas).
- 3** Lightly mist a 4x8 area of the wood floor with PALLMANN® CLEAN STRONG. Allow product to sit 2-3 minutes.
- 4** Using a white polishing pad, begin buffing the wood floor. **CAUTION:** Use only a white pad for this procedure. A more aggressive pad may cause scratching of the floor finish. Do not let the Clean Strong product dry prior to buffing. To prevent this, it may be necessary to re-mist the floor during buffing. Continue working in 4x8' sections until the entire floor is clean.
- 5** After letting the floor dry for no more than 10 minutes, clean the working area with PALLMANN® HARDWOOD FLOOR CLEANER and a clean PALLMANN® MICROFIBER PAD. It is important to change to a new microfiber pad for every 500 sq/ft of wood flooring. Continue cleaning the floor with PALLMANN® HARDWOOD FLOOR CLEANER until all CLEAN STRONG residue is removed.
