

A Family Heirloom From Day One

FRONTENAC

Solid Wood Flooring

Maintenance

CUSTOMER OBLIGATIONS REGARDING THE MAINTENANCE OF A HARDWOOD FLOOR

- Maintaining the relative humidity level in your house; refer to the table of Annex A “MANDATORY INSTALLATION CONDITIONS BY PRODUCT TYPE”;
- Immediately wipe away any spills;
- Sweep or vacuum regularly;
- Clean your floor with product specifically designed for it;
- Lightly spray the cleaning product on a dry mop or sweeper. Never pour a cleaning product directly on your floor;
- Never clean your floor with a wet mop;
- Install a small rug or a door mat in front of every entrance in order to protect your floor from abrasions and humidity; regularly clean and vacuum those rugs/mats
- Install small felt pads - or other soft, protective material - under furniture legs to protect the floor from abrasion and dents; replace them regularly by new ones. Do not use hard or plastic covers
- Never move any heavy objects without protecting your floor. Should you have to move a heavy object, put the object on an upside down clean rug or carpet, and gently slide it across the floor
- Never use wax, oil-based detergents or other household cleaning products on your floor. These products could damage the luster/finishing of your floor or make them fade; they are also likely to leave a greasy film on the floor that will make it slippery and hard to clean.
